

Season's greetings

Valéria and her daughter outside the Mecanhelas health centre in Niassa Province, Mozambique, where Valéria gave birth and where they go for all their health needs.

Thanks to your generous support, this health centre now has running water, toilets, and basins for washing hands. Valéria and others in her community know that when visiting their local health centre, the doctors, can wash their hands with soap and water, which helps them deliver the level of care they want to provide and keep their promise to first and foremost, do no harm.

As Valéria says, water saves lives. Water Means Life.

On behalf on everyone at WaterAid,

We would like to wish you a relaxing festive season and a Happy New Year.

This year, we have reached thousands more people with the clean water, decent toilets and good hygiene they need to thrive. We are excited to continue scaling up our activities in 2023 and see what we can achieve together.
